

## **SmileDirectClub, HP and the future of 3D printing in manufacturing**

September 23, 2022

3D printing can enable the creation of highly personalized products at scale. SmileDirectClub teamed up with HP to harness the power of 3D printing to make its aligners and retainers at its state-of-the-art manufacturing facility. Its fleet of 60+ 3D printers make the Company's SmileHouse one of the largest 3D printing facilities in the country. This innovative and agile additive manufacturing process is not only better for SmileDirectClub customers, but also for the planet.

Watch SmileDirectClub and HP talk about the partnership below.
